

CLAIMS

What is claimed is:

- 1 1. A portable climate control dwelling comprising:
2 a collapsible structure defining an enclosure, the
3 collapsible structure interchangeably transformable between a
4 first storage configuration and a second inhabitable
5 configuration and further having a portion defining a
6 resealable climate control unit receiving aperture; and
7 a climate control unit reversibly attachable with the
8 collapsible structure for use in its second inhabitable
9 configuration; whereby the climate control unit conditions the
10 air within the enclosure of the collapsible structure.
- 1 2. The portable climate control dwelling of claim 1, wherein
2 the air is cooled.
- 1 3. The portable climate control dwelling of claim 1, wherein
2 the air is heated.
- 1 4. The portable climate control dwelling of claim 1, wherein
2 the collapsible structure defining the climate control unit receiving
3 aperture comprises an elastic member for engaging the climate
4 control unit to form a weather resistant barrier between the exterior
5 and interior of the dwelling.
- 1 5. The portable climate control dwelling of claim 1, wherein
2 the dwelling is formed from a material selected from the group
3 consisting of polymer, vinyl, nylon, cotton, leather, or combinations
4 thereof.

5 6. The climate control dwelling of claim 5, wherein the
6 dwelling is ballistic nylon.

1 7. A portable climate control unit carrier comprising a
2 plurality of straps, configurable about the exterior of a climate control
3 unit.

1 8. The portable climate control unit carrier of claim 1,
2 wherein the dwelling is formed from a material selected from the
3 group consisting of polymer, vinyl, nylon, cotton, leather, or
4 combinations thereof.

1 9. The portable climate control unit carrier of claim 8,
2 wherein the dwelling is a ballistic nylon.

3 10. An tent adapter, comprising: 
4 a flange having a front and a back, at least a portion of
5 the back affixable to a tent;
6 a boot having first and second ends defining a
7 longitudinally extending aperture there between, the boot
8 affixable at the first end perpendicularly to the flange to affixing
9 a climate control unit to a tent.

1 11. The adapter of claim 10, wherein the second end of the
2 boot has an elastic edge.

1 12. The adapter of claim 10, wherein the second end has a
2 closure for closing the aperture at the second end.

1 13. The adaptor of claim 10, wherein the adapter formed
2 from a material selected from the group consisting of polymer, vinyl,
3 nylon, cotton, leather, or combinations thereof.

1 14. The adapter claim 13, wherein the adapter is a ballistic
2 nylon.

1 15. A kit comprising a collapsible structure defining an
2 enclosure, the collapsible structure interchangeably transformable
3 between a first storage configuration and a second inhabitable
4 configuration and further having a portion defining a pliant,
5 resealable climate control unit-receiving aperture.

1 16. The kit of claim 15, further comprising a climate control
2 unit.

1 17. The kit of claim 15, further comprising a climate control
2 unit carrier.

1 18. The kit of claim 17, wherein the climate unit is an air
2 conditioner.

1 19. The kit of claim 17, wherein the climate control unit is a
2 heater.

1 20. The kit of claim 15, further comprising an adjustable stand
2 for holding a climate control unit at a predetermined distance in
3 relation to the dwelling.
